

Siri Chandana Vishnubhotla

sirichandanavishnubhotla@gmail.com +917075032603 [iLinkedIn](#) § [GitHub](#)

Profile

Computer Science undergraduate with hands-on experience in full-stack development, workflow automation, and machine learning-based solutions. Skilled in designing scalable applications, integrating APIs, and translating business requirements into efficient technical workflows. Strong in problem-solving, analytical thinking, and collaborating in team-driven environments.

Skills

- Frontend: React.js, JavaScript, Tailwind CSS, HTML, CSS
- Backend Basics: Java, Spring Boot, REST API (CRUD)
- Automation & Tools: n8n, Postman, Git, GitHub
- Machine Learning: Scikit-learn, Pandas, NumPy
- Concepts: API Integration, Workflow Automation, Responsive Design
- Cloud: AWS

Experience

Full Stack Web Developer Intern —KriBudWebTech Dec2025–Mar2026

- Developed and integrated full stack web applications, combining interactive frontend UI with scalable backend services to deliver seamless user experiences.
- Built and consumed REST APIs while implementing efficient state management and data handling between frontend and backend systems.
- Improved performance by optimizing API responses, database queries, and frontend rendering, reducing latency and enhancing usability.
- Debugged and enhanced features across the stack, contributing to reliable, maintainable, and production-ready applications

Projects

Loan Default Prediction System (Banking Domain ML Project)

- Designed and developed a full-stack machine learning system for real-time loan default prediction.
- Translated user and business requirements into structured workflows integrating frontend, backend, and ML components.
- Optimized communication between services to ensure low-latency predictions and smooth user experience.

Automated Resume Screening System (n8n Workflow Project)

[Live](#)

- Collaborated in a team to build an AI-powered platform supporting farmers with real-time insights. Designed scalable backend workflows for handling multi-modal inputs (text, voice, image).

- Integrated AI services to improve response efficiency and system usability.

OrderNow – Food Delivery & Grocery Platform

[GitHub](#)

- Developed a full-stack ordering platform focusing on real-time data handling and responsiveness.
- Improved system performance by optimizing data flow across client, server, and database layers.
- Implemented backend logic to support concurrent users and ensure consistent performance.

Leadership & Collaboration

- Serving as Technical Club Coordinator and Organizer since first year, leading event planning and technical initiatives
- Led cross-functional teams to plan and execute technical events, demonstrating leadership, stakeholder coordination, and problem-solving under deadlines

Education

RVR&JC College of Engineering, Guntur	2023 – 2027 (Expected)
B.Tech in Computer Science and Engineering(AI&ML)— CGPA: 7.7	
Sri Chaitanya Jr College, Vijayawada	2021 – 2023
Intermediate MPC— 92.4%	
Sri Chaitanya Techno School, Avanigadda	2020
SSC- 10.0	

Certifications

- Cloud Engineering — AWS Academy
- Full-Stack Web Development — Udemy

ACHIEVEMENTS

- Participated in Google Capstone Hackathon on AI agents, contributing to the design and development of an AI-based solution in a team environment
- Solved 50+ problems on platforms like LeetCode / HackerRank, strengthening problem-solving and algorithmic thinking
